EIADS team and partners believe that the success should be based on the good planning, management and continued evaluation for the process that is being conducted during the different project stages

- Starting with goals and targets SMART identification (Specification, Measurement, Accuracy, Reality and Timing)
- Stakeholders identification, relations and benefits.
- Project's economics including feasibility study, budgeting solutions and cashflow management.
- Using RASIC matrix to identify the executive stages (Responsibility, accountability, Supporting, Informing and Consulting roles)
